

## Best in Chinese Enrichment

# mandarin masters

EduGrove, a market leader in Mandarin enrichment classes is the 5th time winner of the Parents World, **Best Enrichment & Learning Schools Award** for Chinese for the year 2019/20.

**E**duGrove has deliberately sought and maintained a student centric, fun-filled approach to teaching Mandarin. It is a paradigm shift from the traditional approach of teaching Chinese which is authoritative, rigid and thus ineffective according to the passionate founders of EduGrove: Jerry and Dong Yue.

EduGrove's objective is to cut the tedium in learning Mandarin so that the children do not dread the language. The effort is to build the students' confidence in the language by engaging them in classroom discussions and allowing them to use the language informally in drama and specially designed word games.

With the help of skilled and trained Mandarin teachers, children are able to use Mandarin as a language in which they think and talk and not just as a second language. The fun and engaging method of learning ensures that the children retain commonly tested Mandarin keywords and phrases in their long term memory and use them

effectively in examinations. EduGrove thus encourages its students not only to learn the language but also to "love it and live it!"

Through its award winning curriculum which is aligned with the Ministry of Education's (MOE) syllabus for Chinese Language at both primary and secondary levels, EduGrove aims to improve the students' communication skills - both oral and written. Not only that, EduGrove also has a proven track record of a notable number of students scoring A\*s in their Chinese papers and of other students significantly improving their results after lessons here.

EduGrove offers Chinese enrichment classes for all levels, starting with the Playgroup programme through preschool and primary school years right up to secondary levels. With the help of its successful teaching methodology, EduGrove also helps many non-Mandarin speakers such as students from international schools and adults learn Chinese.
